

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

평면 위의 평행하지 않은 두 직선에 수직인 직선은 평면과 수직이다.

(When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.)

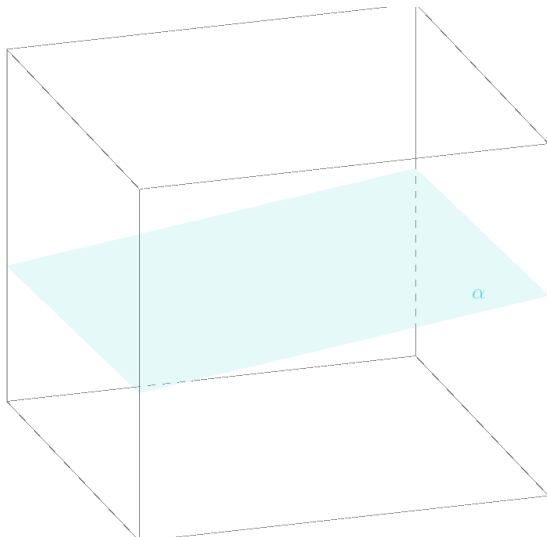

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

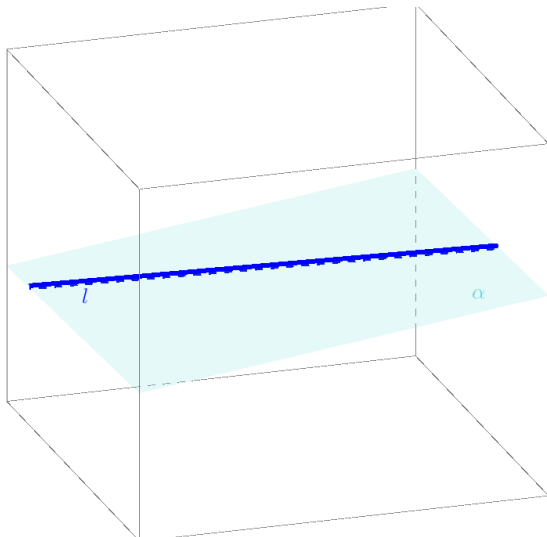

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

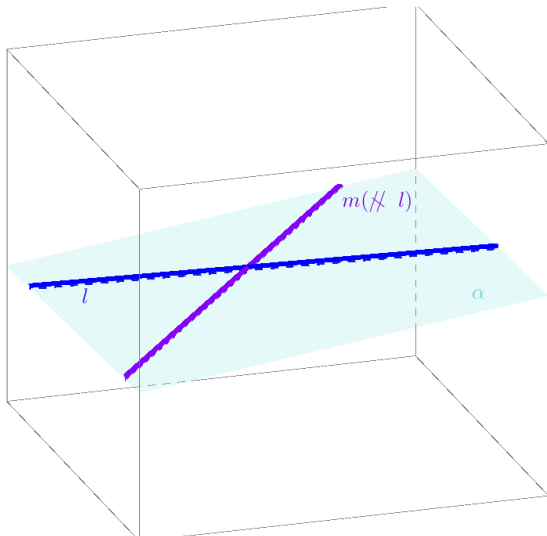

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

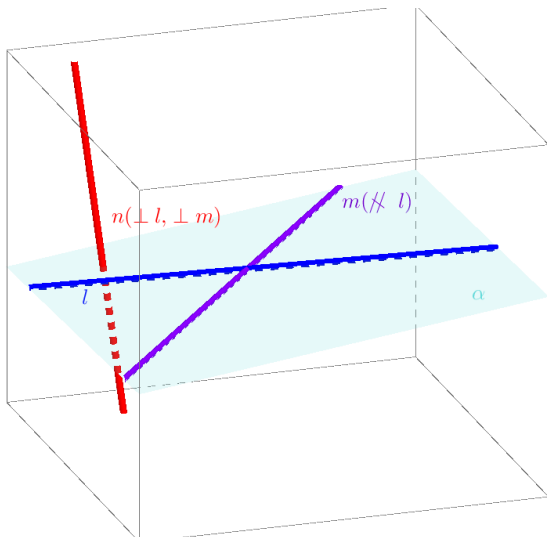

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

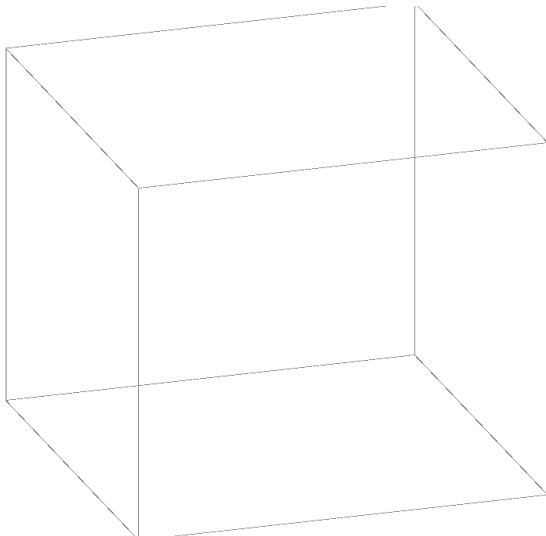

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

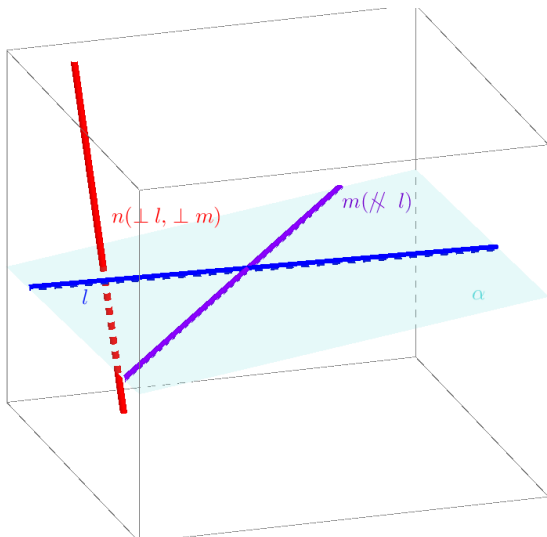

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

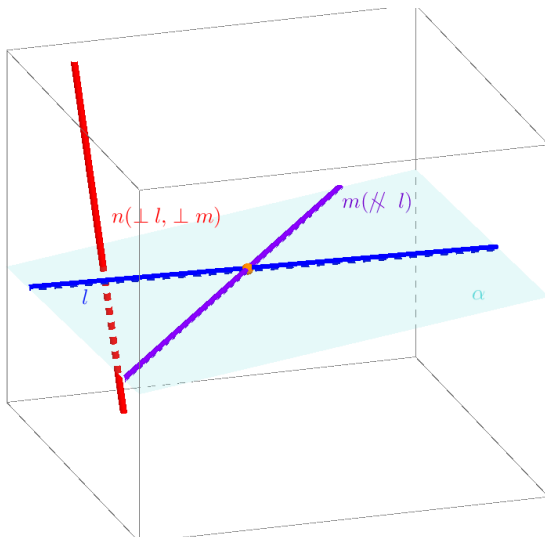

► Start

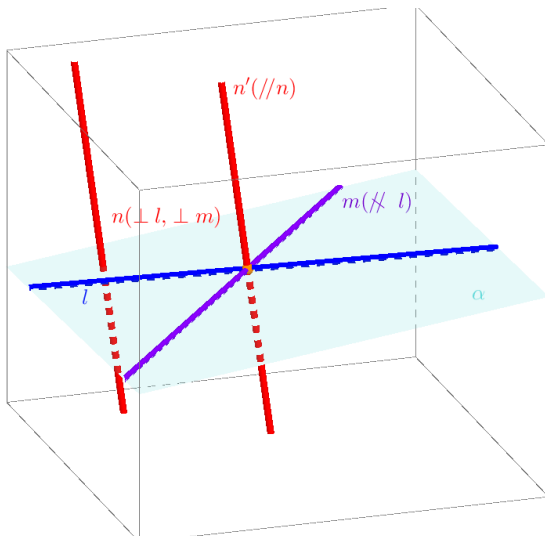

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

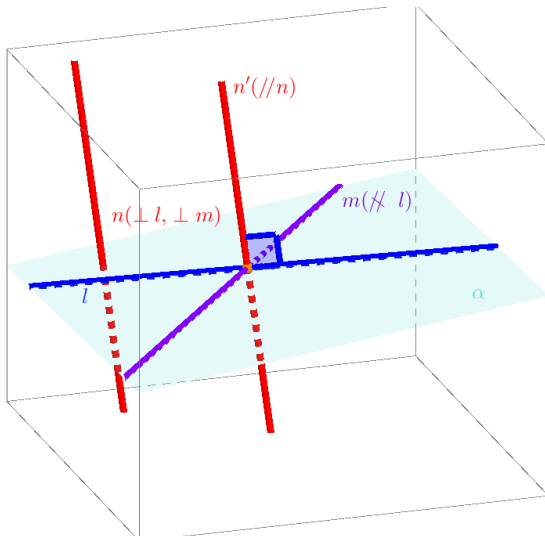

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

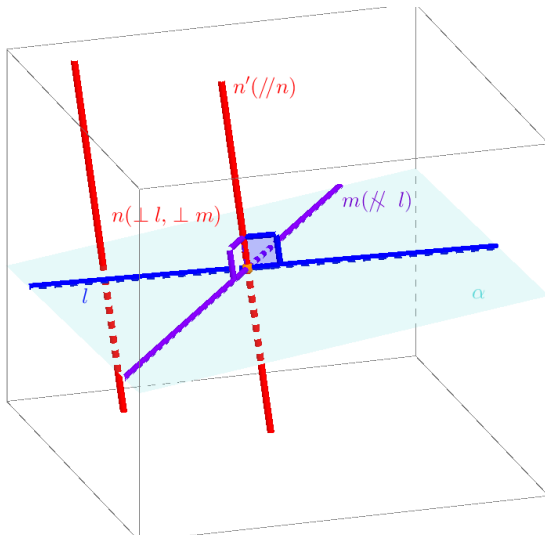

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

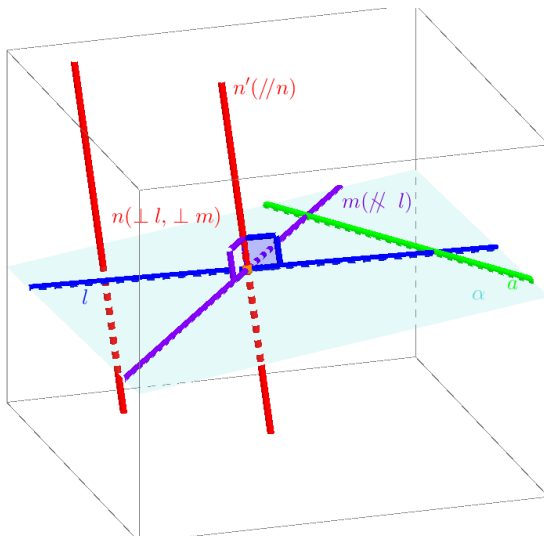

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

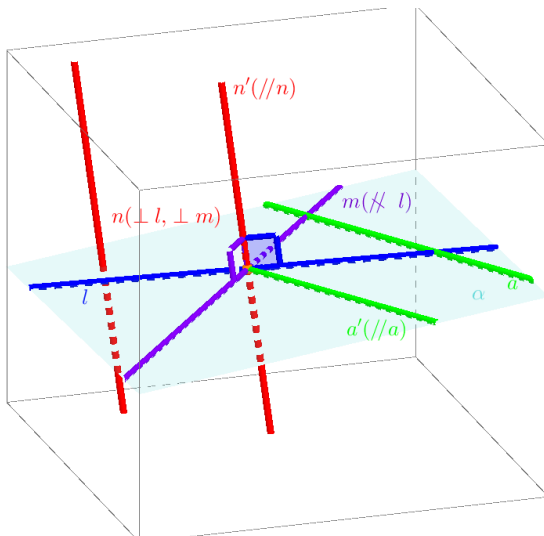

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

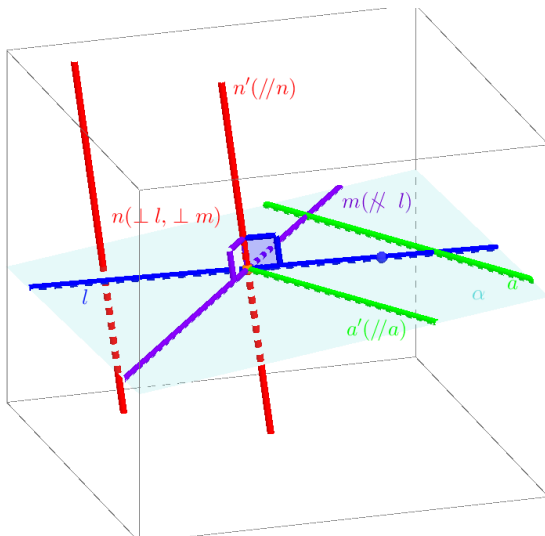

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

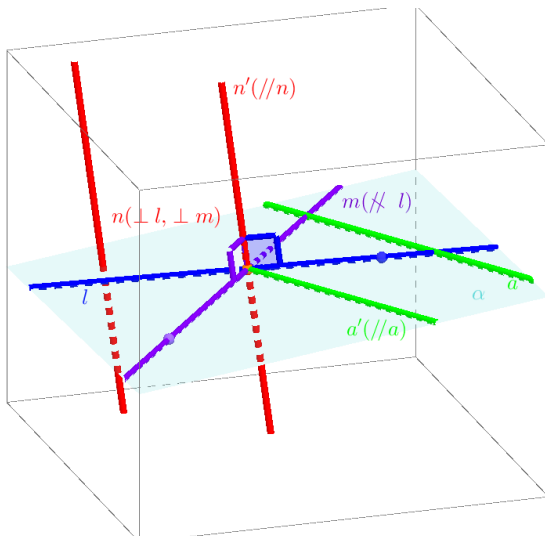

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

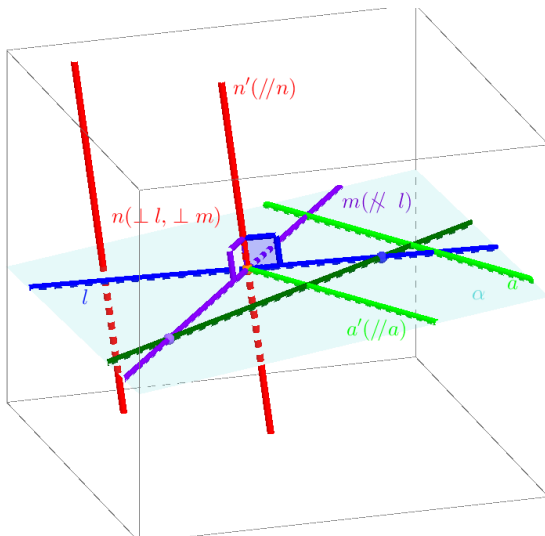

► Start

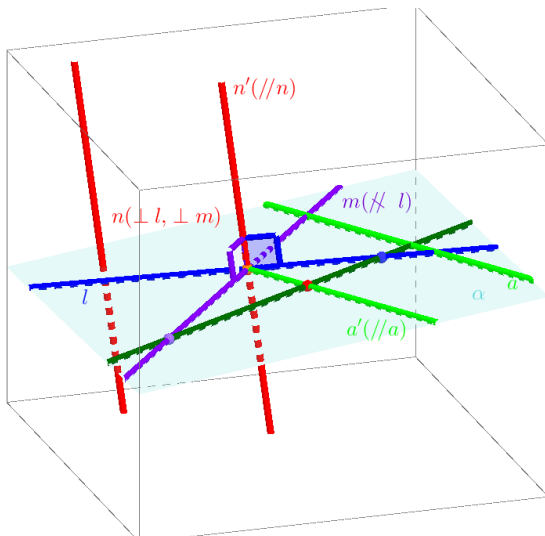

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

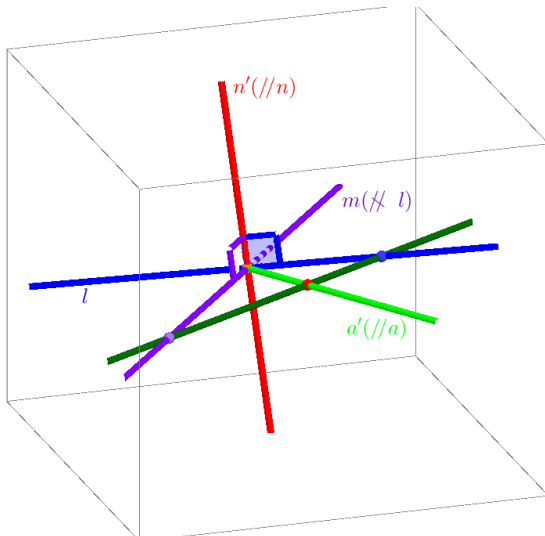

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

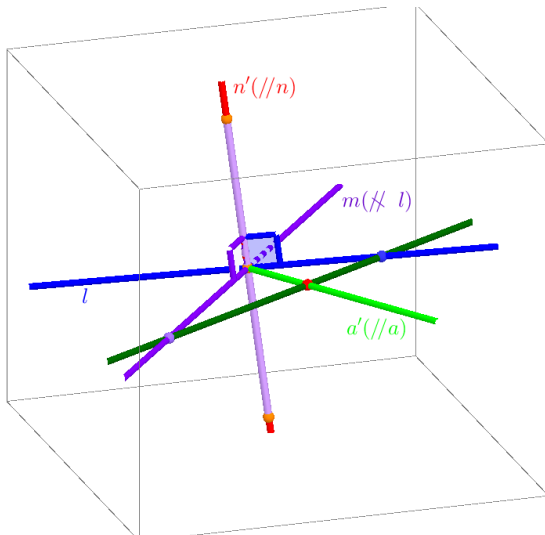

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

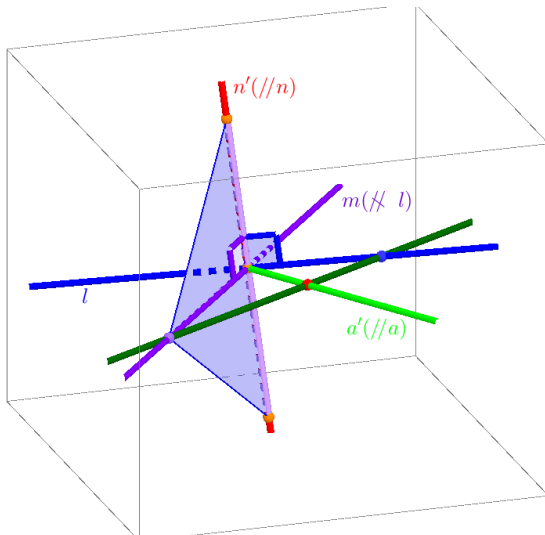

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.

► Start

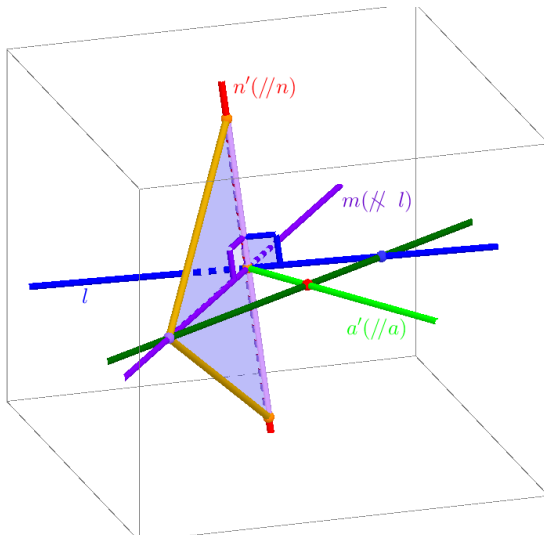

When a line is perpendicular to two non-parallel lines on a plane, it is perpendicular to the plane.
