

When a directrix is $x = -p$ and a focus is $(p, 0)$, find the equation of the parabola.

준선이 $x = -p$ 이고 초점이 $(p, 0)$ 일 때,
포물선의 방정식을 구하여라.

(When a directrix is $x = -p$ and a focus is $(p, 0)$, find the equation of the parabola.)

When a directrix is $x = -p$ and a focus is $(p, 0)$, find the equation of the parabola.

When a directrix is $x = -p$ and a focus is $(p, 0)$, find the equation of the parabola.

When a directrix is $x = -p$ and a focus is $(p, 0)$, find the equation of the parabola.

When a directrix is $x = -p$ and a focus is $(p, 0)$, find the equation of the parabola.
