

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

원에 내접하는 사각형에서 한 쌍의 대각의 크기의 합은 180도이다.

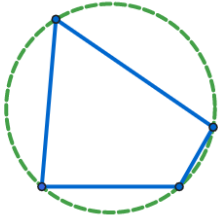

(In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.)

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

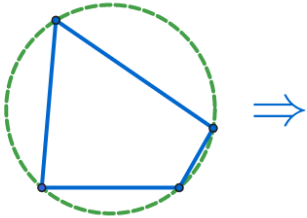

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

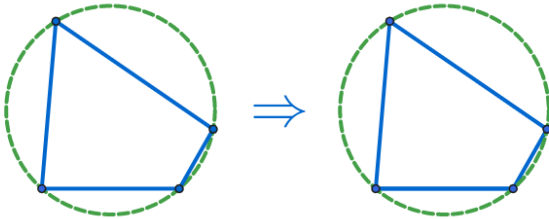

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

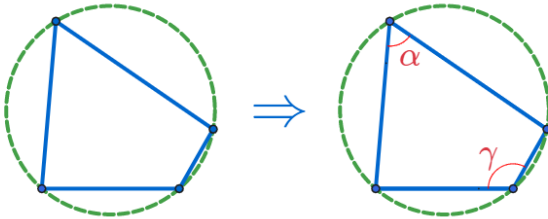

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

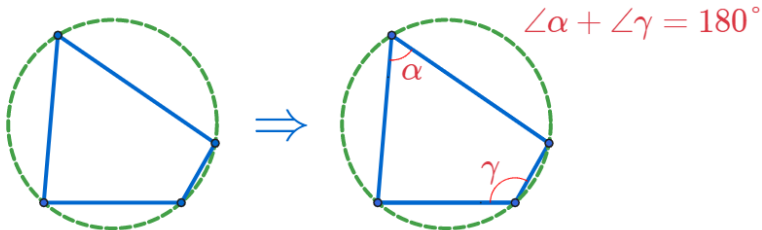

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

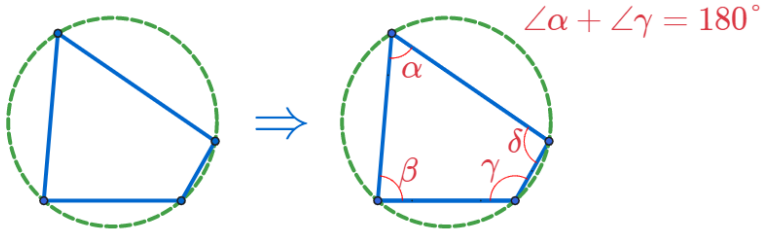

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

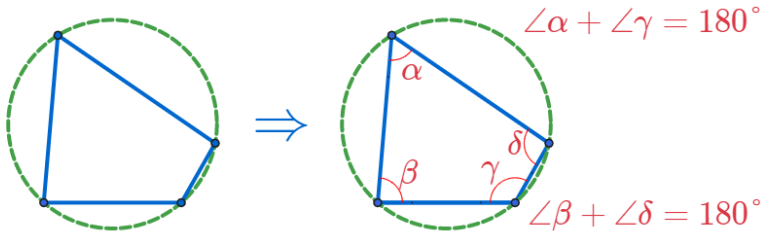

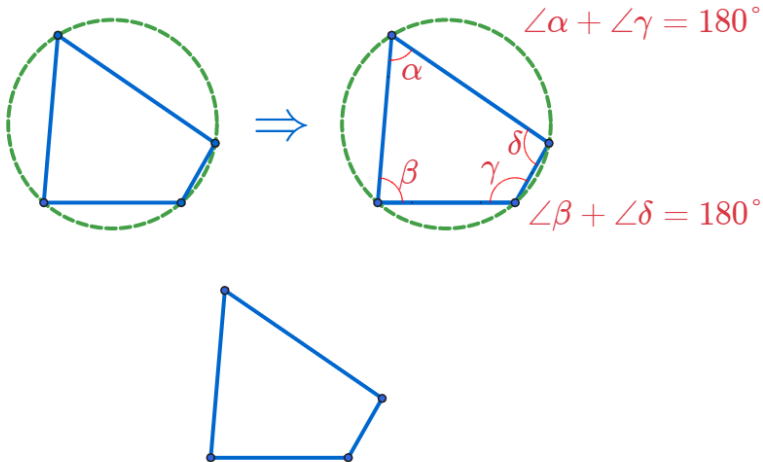

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

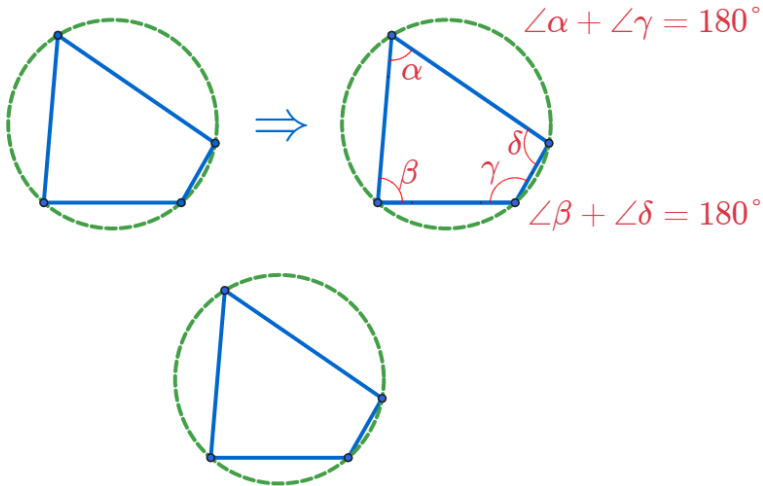

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

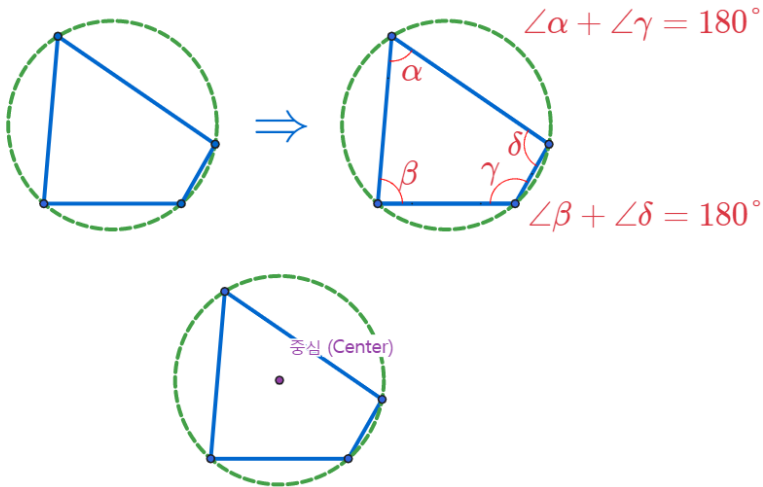

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

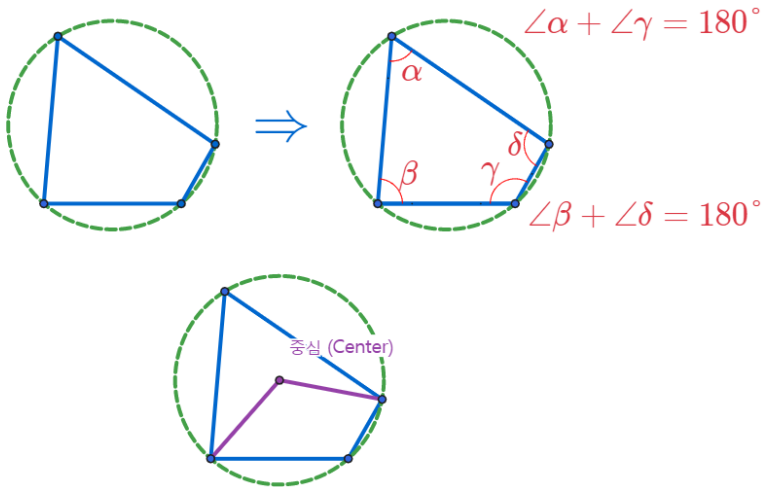

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

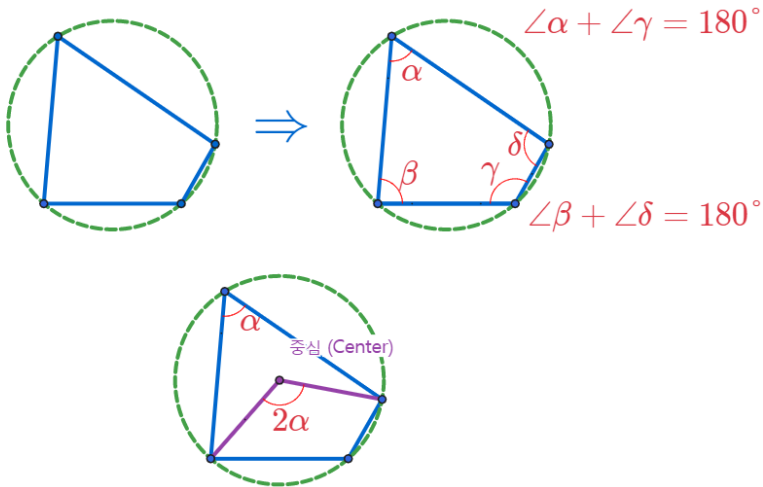

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

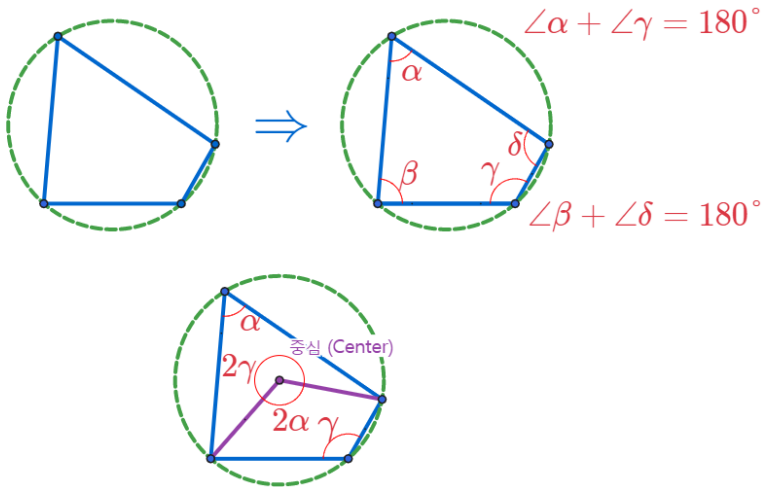

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

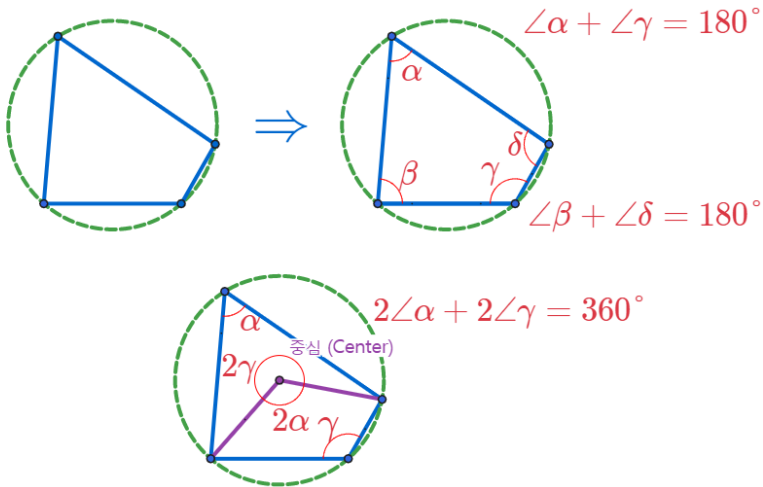

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

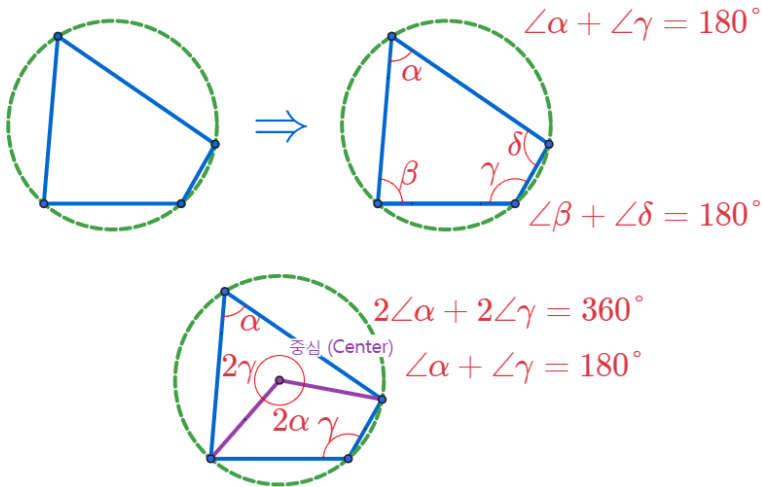

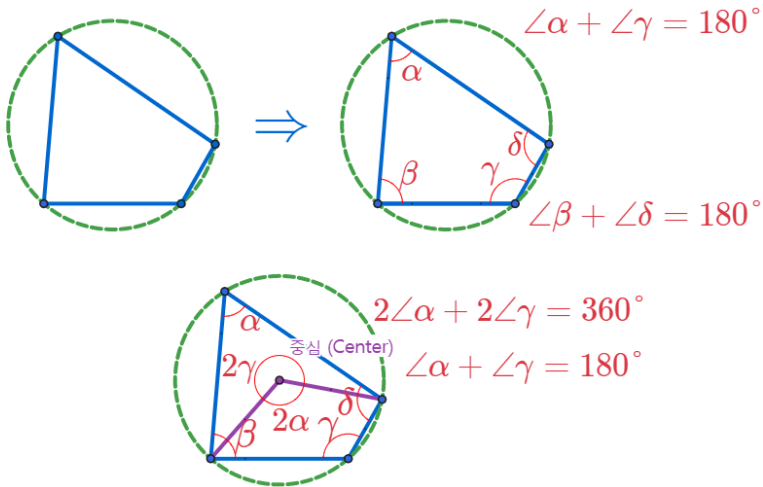

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

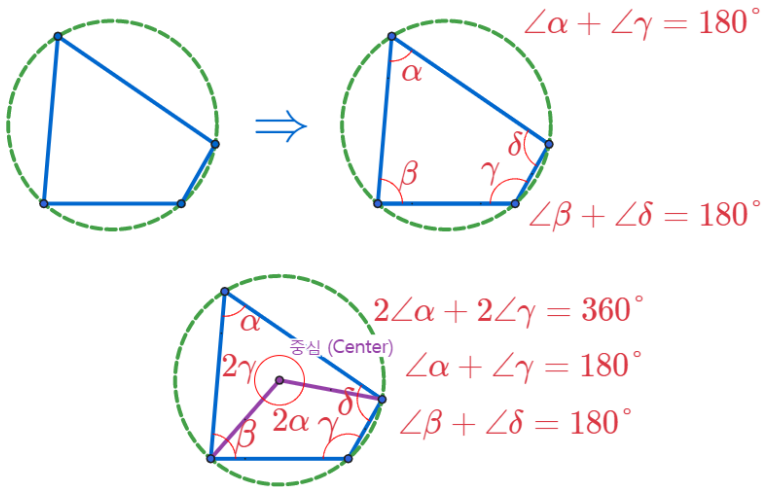

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.

In a tetragon inscribed in a circle, the sum of the size of the pair of diagonals is 180 degrees.
